WHO WE ARE

Comprised of experts formerly with the FBI, military, government & private sector, the CI team gathers information and conducts operations to identify threats to an organization to help protect against malicious activity.

The team uses a human-driven, technology assisted approach to search the darknet, internet and social media for threat indicators against your business. Actionable reporting helps you to stay informed and prepared on the areas that matter most to you. Receive daily intelligence briefings to help stay up-to-date on the latest threats happening around the world.
